

Paper Ideas?

Alper Duman

May 28, 2011

1. What was the network of Boltzmann-Wittgenstein-Keynes-Einstein? Trace the development of Analytical (Un)Certainty and Fundamental Uncertainty.
2. List the Nobel prize winners in Economics and in physics in the last 50 years. Find their supervisors and professors in graduate school. Try to calculate entropy/energy flow in the respective networks. Conjecture in physics information/entropy/energy transfer will be greater.
3. The story of Louis Crane. A prodigy and a socialist in University of Chicago. Expelled for demonstration against the invasion of Cambodia. Loop quantum gravity theory.
4. Two tales of two religious men: Gulen and Arizmendi. Both built world re-known networks. What were their principles? How did they change the lives of millions?
5. Property Rights Regimes and Political Economy of Networks: OYAK, MEYAK and IYAK in Turkey? Could OYAK survive without exogenous support?
- 6.
